

Lectures:

- Table top science (Swinney, 18 June Morning)
- Science education (Shatz, 18 June Afternoon)
- Image analysis (Shattuck, 19 June Morning)
- Bio-physics (Schoetz, 19 June Afternoon)
- Optical networks (Roy, 20 June Morning)
- Nonlinearity in fluid networks (Storey, 20 June Afternoon)
- International collaboration (Niemela, 21 June Morning)
- The scientific method (Lathrop, 21 June Afternoon)
- Optical illusions / Seeing the light (Roy, 21 June Evening)
- Soft matter (Weeks, 22 June Morning)
- Collective motion (Zhang, 22 June Afternoon)
- Neural networks (Cai, 23 June Morning)
- Chemical oscillators (Showalter, 23 June Afternoon)
- Cell migration (Rericha, 25 June Morning)
- Non-linear dynamics in biology (Ouyang, 26 June Morning)
- Science 2.0 (Xu, 26 June Afternoon)
- Locomotion (Goldman, 27 June Morning)
- Bacterial competition (Swinney, 27 June Afternoon)
